Gurgaon, India · +91 81449 75778 · certainlysohail@gmail.com · linkedin.com/in/certainlysohail

EXECUTIVE PROFILE

AI Product Manager and Growth Consultant working at the intersection of product strategy, generative AI, business operations, and founder advisory. Experience advising 75+ early-stage founders and leading 250+ consultative engagements across Europe and the Middle East. Focused on customer problem discovery, systems design, workflow automation, and commercial impact.

PROFESSIONAL EXPERIENCE

Growth Consultant — Masters' Union

Gurugram, India

- Advise 75+ founders on product validation, product-market fit, and scalable business model design.
- Facilitate AI-enabled business brainstorming workshops with founders, operators, and industry domain experts.
- Analyse business models, customer segments, competitive positioning, and growth opportunities across acquisition, conversion, and retention.
- Evaluate operational bottlenecks, founder dependencies, and execution constraints to create actionable roadmaps.

Senior Consultant — Topmate.io

Bengaluru, India

- Managed 250+ consulting engagements for professionals and executives across Europe and the Middle East.
- Generated INR 65 lakh+ revenue in a single month through structured consultative advisory and decision frameworks.
- Built market analysis and positioning frameworks aligning client capabilities with industry demand.
- Collaborated with leadership and cross-functional teams to improve consulting workflows and user journeys.

Product Management Intern — Topmate.io

Bengaluru, India

- Conducted customer research, user pain point mapping, and competitive benchmarking to inform feature definition.
- Assisted in defining PRDs, documenting stakeholder input, and evaluating customer journeys for automation.
- Supported KPI tracking, onboarding optimization, and internal process documentation.

Product Management — Leap Scholar

Bengaluru, India

- Supported customer onboarding and lifecycle strategy for international education products serving MENA markets.
- Analysed customer support trends and feedback loops to recommend product experience enhancements.

Business Data Analyst — Process360 Ltd.

Hyderabad, India

- Assisted with process mapping, workflow optimization, quality assurance, and operational risk assessments.
- Analysed operational datasets and business requirements to support data-driven decision-making.
